Part One

CARBURETTOR

OPERATION PRINCIPLES5

Engine fuel and air feed systems5

What the carburettor does5

Engine mixture metering requirements6

Engine operation range6

The Simple Spray Carburettor7

Fundamental carburettor systems8

Simple spray carburettor defects8

The Modern Carburettor9

Air bleed correction9

Idle speed (or slow running) device9

Acceleration progression10

Starting device or choke11

Manual choke of the auxiliary carburettor type12

Manual choke of the shutter valve type12

Automatic choke12

Modern Carburettor Features14

Auxiliary (or secondary) Venturi14

Multi-barrel carburettors14

Mixture strength control devices15

Dust-proof carburettors16

Needle-valve spring dampers17

Idle shut-off solenoid17

Slot progression17

Anti-stall device17

Throttle kicker17

Float chamber vent solenoid17

Stepper motor18

Fuel feed system18

Part Two

WEBER CARBURETTOR

ADJUSTMENT SETTINGS20

40 DCOE 2 carburettor

Adjustment setting example20

1) Main or primary Venturi21

2) Auxiliary or secondary Venturi22

3) Main jet23

4) Air correction jet23

5) Emulsion tube24

Calibrated parts –

The Weber part numbering system24

Emulsion tube drawings25-35

Conversion table for “E” tubes36

Calibrated parts table:

auxiliary venturis, chokes, main jets, idle jets37-38

6) Idle jet39

Calibrated parts table:

acceleration pump jets, air correction jets,

needle valves40-41

Engine idle speed rate adjustments41

7-8-9) Accelerating pump jet and drain43

10) Choke jet44

11-12) Needle valve45

13) Fuel level in float chamber or bowl45

14) Float-weight45

15) Flared air horn extensions45

Part Three

INSTALLATION AND CHECKS ON ENGINE –

ADAPTATIONS47

Intake manifold47

Exhaust system48

Air cleaner48

Application examples – Tables 1 and 249-52

Accelerator control54

Fuel supply lines54

Carburettor installation on engine54

Checks on engine55

Idle speed rate adjustments on sport engines55

More commonly used instruments59

Road tests59

Ice formation in carburettors60

Altitude operation60

Fuels containing alcohols61

Operation Faults61

Starting difficulties at low temperature61

Starting difficulties with warm engine61

Slow running difficulties61

Flooding and fuel losses62

Inadequate pick-up and speed

Excessive fuel consumption62

Part Four

AIR HORNS63

SPECIAL APPLICATION

CARBURETTORS64-83

40 DCOE, 40 DCNF, 40 IDF, 44 IDF, 45 DCOE,

48 DCO 2/SP, 48 IDA, 48 IDF, 50 DCO SP, 55 DCO SP

CONTINUED

Part Five

AUXILIARY COMPONENTS84

including:-

Fuel inlet pipes
Throttle levers
Interlocking levers
Pump rods
Choke tubes and Auxiliary venturi
Pump rod and throttle return springs
Pump cams
Starter jets

QUAD BARREL CARBURETTOR

CALIBRATED PARTS89

Metering jets
Metering rods
Step-up spring assortment
Calibration kit
Throttle shaft application list
Idle adjustment tool 99902191
Linkages for DCOE carburetors
