[1:0] BRAKES PARTS**[1:1] "COMPETIZIONE" brake discs for gr.N and performance cars.**

The Advanced Innovation Technology "COMPETIZIONE" brake discs are both balancing in term of the outside diameter and the inside of the discs to give the better performance. These discs has high temperature heat treatment no drills no grooved. They're produced to replace the standard O.E. brake rotors.(Group "N" specs.). Are made to be used with High Performance Brake Pads like ferodo Racing, Pagid, Carbon Metal.
We do have a special production of brake pads for fast road applications also . These discs are drilled & grooved.

[4:0] COMPONENTS**[4:1] LIGHT wheel spacers**

The wheel spacer "LIGHT", machined from castings, are ideal for road application & are also very cost effective with multiple application ability (4&5 holes). "Competition" spacers are produced on the same digital machinery but from higher grade aluminium bar for individual models. These spacers are anodised to prevent oxydation. Priced in axle sets of 2 pieces. For ease of fitment we may supply a full range of bolts or studs & nuts of [4:2].

Price and available on request, please write to vendite@tecno2.it

[4:2] NUTS STUDS and BOLTS for wheels

Wheel studs & bolts are produced from high tensile steel having rolled threads, reducing the risk of fatigue failures. Knowledge from our competition experience has led us to use a dissimilar material of the nut from that of the wheel stud. This plus copper coating of the nut assures security

[5:0] SPECIAL ENGINE PARTS**[5:1] A.I.Tech. Special head bolts**

A.I.Tech. special cylinder head bolts are a direct replacement for the standard bolts. These bolts are made from very high tensile steel blanks. Basic machining is carried out prior to heat treating and then finally the finishing process cleans up the thread profile. These bolts help to protect the head gasket integrity in uprated engines. Special group A & WRC cyl head bolts are available on demand.
