# Please Note: Some OE sets have an 'impulse sensor' on No. 6 cable - the vehicle will run perfectly without this sensor. Magnecor can supply the sensor at extra cost. Correct year model of vehicle required as 2 different sensors are used. Prices and part no's below eg. 6030/S. The sensor can only be fitted to 7mm/8mm & 8.5mm sets.

Please question your customers about the terminal fittings used on their vehicle. (i.e. conv./post/pin). Some vehicles have conventional fit distributor cap and pin type coils etc. Another common problem is the vehicle has been fitted with the incorrect distributor cap at some stage during a service or repair i.e. it has a conventional fit type, where it should have a pin fit type. This obviously causes a lot of problems as a lead set is also fitted at the same time to match the incorrect distributor cap.							
Engine codes and application notes are the only method we use to recognise the correct lead set for your car - please use them.
